Hiring Team
Vector Institute (AI Program Design)
Toronto, ON

Re: Applied AI Program Design & Delivery Intern

Dear Hiring Team,

I am writing to apply for the Applied AI Program Design & Delivery Intern position at Vector Institute. As a third-year Computing Science co-op student at Thompson Rivers University, I bring both hands-on technical building experience and real operational delivery experience.

As Co-Founder of BecomeAfish and InferenceSaver, I've taken two products from concept to live users, BecomeAfish processing CAD \$5K in its first two months and InferenceSaver processing \$5.6K+ across 129 users, meaning I understand the full arc from building something to actually delivering it to real people.

My internship with the City of Merritt added program-delivery experience at an operational level: managing 163 IT tickets end to end and documenting a full REST API runbook so the work was usable by others, not just by me.

I would welcome the opportunity to discuss how my delivery-focused experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
