Hiring Team
Vector Institute (Applied ML)
Toronto, ON

Re: Applied Machine Learning Intern

Dear Hiring Team,

I am writing to apply for the Applied Machine Learning Intern position at Vector Institute. As a third-year Computing Science co-op student at Thompson Rivers University, I'm excited by the chance to work at an institute so directly focused on turning AI research into real-world impact.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform from the ground up, serving 129 registered users and processing \$5.6K+, including model integration, API design, and diagnosing a subtle Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts.

I'm also an early contributor to AgentMemory (28,275+ GitHub stars), giving me exposure to applied ML engineering beyond my own projects. My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing.

I would welcome the opportunity to discuss how my applied ML experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
