Summary

Third-year Computing Science co-op student with production AI product, TypeScript, React, Python, REST API, cloud, and database experience. Seeking HeyGen's Winter 2027 Software Engineering Internship to build impactful AI features across the stack.

Education

Thompson Rivers University Kamloops, BC

Bachelor of Computing Science (Co-op Program) *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

Experience

Co-Founder & Software Engineer July 2025 – Present

InferenceSaver *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**

Co-Founder & Technical Lead March 2026 – Present

BecomeAfish *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within 2 months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications

Projects

AgentMemory GitHub | Live

Open-Source Contributor *TypeScript, Node.js, MCP, SQLite*

- Contributed to an MCP-compatible persistent memory system for AI coding agents
- Worked in a TypeScript codebase spanning session recording, workspace context, and semantic retrieval

Preflight GitHub | Live

Hackathon Developer *Next.js, TypeScript, Amazon Nova, Playwright*

- Built a multimodal launch scanner combining source-code context, DOM audits, and responsive screenshots
- Used Amazon Nova models to identify visual, routing, and performance issues and produce remediation checklists

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
Frameworks: Next.js, React, Node.js, Prisma
Backend & Data: Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
Cloud & Development: Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
Platforms & Integrations: Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
IT Systems: Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
