# Mandeep Singh

778-538-2869 | mandeepsinghwani@gmail.com | Kamloops, BC | mandeep.work | LinkedIn | GitHub

## Summary

Third-year Computing Science co-op student with production Python, backend services, testing, PostgreSQL, Docker, APIs, and infrastructure experience. Seeking Kepler's Software Engineering Internship to support satellite network and mission-control software.

## Education

**Thompson Rivers University** Kamloops, BC

*Bachelor of Computing Science (Co-op Program)* *2023 – Present*

- Third-year student focused on software engineering, information systems, and computer networks
- Relevant coursework: Computer Networks, Operating Systems, Web-Based Information Systems

## Experience

**Co-Founder & Software Engineer** July 2025 – Present

*InferenceSaver* *Next.js, React, TypeScript, Convex, Stripe*

- Co-founded and developed a production **AI API gateway and multimodal generation platform** providing unified access to language, image, video, music, and voice models for **129 registered users**
- Built product interfaces, backend workflows, authentication, payments, affiliate systems, and model integrations supporting **$5.6K+ in confirmed platform credit allocations across 60 top-ups**

**Co-Founder & Technical Lead** March 2026 – Present

*BecomeAfish* *Next.js, TypeScript, PostgreSQL, Stripe*

- Built and launched a booking and payments platform supporting **108 registered accounts** and **133 scheduled lessons**, processing nearly **CAD $5K within 2 months** of commercial operation
- Engineered geographic instructor matching, role-based portals, and Stripe webhooks; automated **8 workflows** covering payroll batching, reconciliation, and notifications

## Projects

**PromptLine** GitHub | Live

*Open-Source Developer* *Rust, Tokio, Ratatui, OpenAI API*

- Engineered a Rust AI CLI with asynchronous multi-provider streaming and terminal-native agent workflows
- Implemented permission-aware file operations and encrypted local API-key storage

**Preflight** GitHub | Live

*Hackathon Developer* *Next.js, TypeScript, Amazon Nova, Playwright*

- Built a multimodal launch scanner combining source-code context, DOM audits, and responsive screenshots
- Used Amazon Nova models to identify visual, routing, and performance issues and produce remediation checklists

## Technical Skills

**Languages:** TypeScript, JavaScript, Python, Java, SQL, Rust, PowerShell, HTML/CSS
**Frameworks:** Next.js, React, Node.js, Prisma
**Backend & Data:** Convex, PostgreSQL, Supabase, REST APIs, Webhooks, OAuth, RBAC, Session Authentication
**Cloud & Development:** Vercel, Git, GitHub, Docker, Linux, CI/CD, Automated Testing, Scheduled Jobs
**Platforms & Integrations:** Stripe, Resend, Twilio, Google APIs, Meta Graph API, GA4
**IT Systems:** Windows Administration, Microsoft 365, SmartDeploy, BitLocker, Device Deployment, Identity & Access Management
