Hiring Team
A Thinking Ape
Remote, Canada

Re: Software Development Engineer Co-op

Dear Hiring Team,

I am excited to apply for the Software Development Engineer Co-op position at A Thinking Ape. As a third-year Computing Science co-op student, I have already been operating as a full-stack developer in production, co-founding and building two live consumer platforms end-to-end, and I am drawn to the opportunity to bring that same ownership to A Thinking Ape's mobile products.

At BecomeAfish, I built and launched a booking and payments platform from scratch with Next.js, TypeScript, and PostgreSQL, supporting 108 registered accounts and processing nearly CAD \$5K within two months of launch, including automated backend workflows for payroll and reconciliation. At InferenceSaver, I worked across the full stack of a production AI API gateway serving 129 registered users, including diagnosing and fixing a payment-processing defect affecting real customer transactions.

My internship with the City of Merritt rounded out my experience with real-world technical support, managing 163 IT tickets and documenting a full REST API runbook. I bring a genuine full-stack skill set and the initiative of someone who has already shipped and operated real software products used by real customers.

I would welcome the opportunity to discuss how my full-stack development experience can contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
