Hiring Team

BMO Financial Group (Quantitative Developer, GAM/Alpha Research)

Toronto, ON

Re: Quantitative Developer (Alpha Research Team) - GAM - Co-op

Dear Hiring Team,

I am writing to apply for the Quantitative Developer (Alpha Research Team) - GAM - Co-op (12 months) position at BMO Financial Group. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the longer term as a chance to make a deeper contribution to quantitative research infrastructure.

As Systems Analyst Intern with the City of Merritt, I managed 163 IT tickets and built a full REST API runbook through hands-on testing, developing a careful, systems-level approach to enterprise infrastructure.

As Co-Founder of BecomeAfish and InferenceSaver, I've built and operated production software where correctness had real financial consequences, including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my systems and engineering discipline could contribute to your team over this longer term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
