Ciena
Ottawa, ON

Re: Software Eng., Optical Transport and IP Networking Intern

Dear Hiring Team,

I am writing to apply for the Software Eng., Optical Transport and IP Networking Intern position at Ciena. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to build software for the networking infrastructure the internet runs on.

As Systems Analyst Intern with the City of Merritt, I managed 163 IT tickets spanning network and systems support, and built a full CityWide REST API runbook through hands-on curl and PowerShell testing.

As Co-Founder of InferenceSaver, I've built and operated backend API infrastructure for a live platform processing \$5.6K+ across 129 users, including diagnosing a Stripe webhook idempotency defect.

I would welcome the opportunity to discuss how my systems and networking-adjacent experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
