Hiring Team

General Dynamics Mission Systems–Canada (System of Systems Engineering)

Ottawa, ON

Re: System of Systems Engineering - Co-op Winter 2027

Dear Hiring Team,

I am writing to apply for the System of Systems Engineering - Co-op Winter 2027 position at General Dynamics Mission Systems-Canada. As a third-year Computing Science co-op student at Thompson Rivers University, I bring a strong software engineering foundation and a track record of building reliable, production-grade systems.

Through BecomeAfish and InferenceSaver, I have built and maintained backend systems that must behave correctly under real usage: automated payroll and reconciliation workflows, webhook-driven integrations, and payment processing where I diagnosed and fixed an idempotency defect affecting live transactions.

My internship with the City of Merritt further developed my ability to work methodically through complex technical systems, including a full REST API runbook and managing 163 IT tickets.

I would welcome the opportunity to discuss how my software engineering background could contribute to your team this Winter 2027 term.

Thank you for considering my application.

Sincerely,

Mandeep Singh
