Montreal, QC

Re: Software Development and Artificial Intelligence Intern

Dear Hiring Team,

I am writing to apply for the Software Development and Artificial Intelligence Intern position at GIRO Inc. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to apply AI to real transportation and logistics software.

As Co-Founder of InferenceSaver, I've built and operated an AI API gateway and multimodal generation platform serving 129 registered users and processing \$5.6K+, including model integration and diagnosing a Stripe webhook idempotency defect.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my applied AI and software development experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
