Hiring Team
Intelcom — Dragonfly
Montreal, QC

Re: Back-end Developer Intern - Mobile Application

Dear Hiring Team,

I am writing to apply for the Back-end Developer Intern - Mobile Application position at Intelcom — Dragonfly. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to build backend systems supporting a live mobile app at logistics scale.

As Co-Founder of InferenceSaver and BecomeAfish, I've built and operated backend systems handling real API traffic and payment processing, including diagnosing and fixing a Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my backend development experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
