Hiring Team
L3Harris (FPGA Software Tool Developer)
Waterdown, ON

Re: FPGA Software Tool Developer Co-Op (Waterdown, CAN)

Dear Hiring Team,

I am writing to apply for the FPGA Software Tool Developer Co-Op position at L3Harris in Waterdown. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to build tooling closer to the hardware layer at a defense technology company.

As Systems Analyst Intern with the City of Merritt, I worked directly with servers and hardware, including close-to-metal specification work, alongside low-level system configuration across 163 IT tickets. I'm also proficient in Rust and C.

As Co-Founder of InferenceSaver and BecomeAfish, I've built and operated production software where correctness and reliability were non-negotiable, including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my systems background and low-level programming experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
