Hiring Team
Lumentum Canada
Nepean, ON

Re: Embedded Software DevSecOps Engineer (Co-op Student)

Dear Hiring Team,

I am writing to apply for the Embedded Software DevSecOps Engineer (Co-op Student) position at Lumentum Canada. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to the chance to work closer to the hardware layer at a leading photonics company.

As Systems Analyst Intern with the City of Merritt, I worked directly with servers and hardware, including close-to-metal specification work, alongside device deployment and low-level system configuration across 163 IT tickets. I'm also proficient in Rust and C.

As Co-Founder of InferenceSaver and BecomeAfish, I've built and operated production software with real DevOps practices (Vercel, Docker, CI/CD), including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my systems, security, and low-level programming background could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
