Hiring Team
RBC (Quantitative Technology Services)
Toronto, ON

Re: Quantitative Technology Services Co-op (Various Positions)

Dear Hiring Team,

I am writing to apply for the Quantitative Technology Services Co-op (Various Positions) role at RBC. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to applying software engineering skills in a high-stakes capital markets environment.

As Systems Analyst Intern with the City of Merritt, I built a full CityWide REST API runbook through hands-on curl and PowerShell testing, and managed 163 IT tickets spanning systems support.

As Co-Founder of InferenceSaver, I've operated a live AI platform processing \$5.6K+ across 129 users, including diagnosing and fixing a Stripe webhook idempotency defect, the kind of correctness discipline that matters in financial technology.

I would welcome the opportunity to discuss how my technology and systems experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
