Hiring Team
Reliable Controls (Firmware QA Analyst)
Victoria, BC

Re: Firmware QA Analyst Co-op

Dear Hiring Team,

I am writing to apply for the Firmware QA Analyst Co-op position at Reliable Controls. As a third-year Computing Science co-op student at Thompson Rivers University, I bring a methodical, testing-focused approach that translates well to firmware quality assurance.

As Systems Analyst Intern with the City of Merritt, I worked directly with hardware and systems configuration across 163 IT tickets, developing a careful, detail-oriented approach to technical troubleshooting.

As Co-Founder of BecomeAfish and InferenceSaver, I've built and operated production software where correctness under real usage was non-negotiable, including diagnosing and fixing a Stripe webhook idempotency defect that had silently under-credited 8 of 14 checkouts.

I would welcome the opportunity to discuss how my QA and systems experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
