Hiring Team
Zaber Technologies (Embedded Software Developer)
Vancouver, BC

Re: Embedded Software Developer (Co-op)

Dear Hiring Team,

I am writing to apply for the Embedded Software Developer (Co-op) position at Zaber Technologies. As a third-year Computing Science co-op student at Thompson Rivers University, I'm drawn to Zaber's precision motion-control hardware and the chance to work closer to the hardware layer.

As Systems Analyst Intern with the City of Merritt, I worked directly with servers and hardware, including close-to-metal specification work, alongside device deployment and low-level system configuration across 163 IT tickets. I'm also proficient in Rust and C.

As Co-Founder of InferenceSaver and BecomeAfish, I've built and operated production software where correctness and reliability were non-negotiable, including diagnosing and fixing a Stripe webhook idempotency defect affecting live transactions.

I would welcome the opportunity to discuss how my systems background and low-level programming experience could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
