Hiring Team
Stripe
Toronto, ON

Re: Software Engineer, Intern (Summer or Winter)

Dear Hiring Team,

I am writing to apply for the Software Engineer, Intern (Summer or Winter) position at Stripe in Toronto. As a third-year Computing Science co-op student at Thompson Rivers University, I'm not just interested in Stripe as a platform, I've built directly on top of it in production and had to make it correct under real usage.

As Co-Founder of InferenceSaver, I integrated Stripe for payment processing and personally diagnosed and fixed a webhook idempotency defect that had silently under-credited 8 of 14 checkouts, a bug that only surfaced under real concurrent transaction load. InferenceSaver has processed \$5.6K+ across 129 registered users, and BecomeAfish, my second platform, has also run real Stripe-integrated payments, processing CAD \$5K in its first two months.

My internship with the City of Merritt further developed my systems fundamentals, including a full REST API runbook built through hands-on curl and PowerShell testing and managing 163 IT tickets.

I would welcome the opportunity to discuss how my hands-on experience with Stripe's own platform, and the correctness discipline it demanded, could contribute to your team.

Thank you for considering my application.

Sincerely,

Mandeep Singh
